Exercise 1: Explore the Excel Data Model

[Bookmark this page](#)

Download and open "Lab 2 - The Excel data model.xlsx". If you are using Excel 2010, use this file instead: "[Module 2 - The Excel data model \(2010\).xlsx](#)".

You should see a blank worksheet when opening the file. Open the Data Model by selecting the Manage Data Model icon from either the Data or PowerPivot tabs in Excel 2016; from the PowerPivot tab in Excel 2013; or the Power Pivot Window icon from the PowerPivot tab in Excel 2010. The data has been loaded to the Excel data model. You don't need to refresh or edit the data.

Lab Question

2/2 points (graded)

Answer the following questions by reviewing the Excel data model.

How many tables were loaded into the data model?

☐ 5

☐ 6

☒ 7 ✓

☐ 8
